Aggregate, Stone, Lime, & Cement Processing Experience

Confidential Client #1

- Several projects including work at quarries in the Maryland and West Virginia regions
- Power and controls installation
- Upgraded 60% to 70% of the screens and crushers at quarry in West Virginia

Confidential Client #2

- Facility includes a 1,200 ton per day rotary preheater lime kiln, a 1,050 ton per day rotary lime kiln, and a lime hydrating plant
- Scope of work on various projects included power and controls installation
- Some PLC programming

Confidential Client #3

- Coal Falling Building (i.e. Railroad Car Heating Building) – Scope of work was primarily power and lighting with very little controls installation
- Raw Product Feed Belts into Plant – Scope of work was primarily in a building that housed drives by the facility pond with most work involving the installation of new drives and power systems
- Railroad Car Filling System - the objective for project was to automate the filling process. Scope included power but was heavy in automation controls installation with numerous sensors

Confidential Client #4

- New Pre-Stress Bldg. Project - installed all the electrical power systems for the new building
- Treatment Facility – fabricated, installed control panels and provided PLC programming
- Batch Projects for Highway - scope included power and controls systems installed in tractor trailers for use at highway projects

Confidential Client #5

- Electrical, automation, and controls upgrades for raw mill to finish mill process
- Electrical and controls installation for coal dust collector

Confidential Client #6

- B&B provided design and permitting services to the plant
- Scale Building Project - installed camera system and controls
